

Manifold Valves

Global Bar stock Needle Valves forged valve manifolds are specially designed Needle Valves for operation with most of the Fluids up to 6000 pig (414 barge) and on special request up to 15,000 pig (1035 barge) ratings. These valves are complete with PTFE gland packing or with Graph oil gland packing (For high temperature applications). Placing the gland packing below the stem thread ensures that the process does not get in contact with the Stem threads. Tightening of the upper gland body ensures perfect sealing of the gland packing and arrests leakage.
