

Steam Hose

Steam Hose

These abrasion resistant hoses have the capability to withstand fluctuations in both temperature and weathering, maintaining superior performance throughout. All of our steam hoses meet industry standards and are suitable for use across many of the major industrial markets. **Steam hoses** provide an excellent service across a wide variety of steam applications. Our steam hoses handle easily and are simple to install. They are also highly durable and have crush resistance, guaranteeing a long service life.

Single wire Braided Steam Hose

Application: For uses on Hi-Temperature fluids and steam.

Tube: Steam and heat-resistant EPDM rubber.

Reinforcement: 1 high tensile steel wire braid.

Cover: Synthetic rubber – heat, abrasion ozone and weather resistant.

Temperature Range: Up to 185° C

Double wire Braided Steam Hose

Application: For uses on Hi-Temperature fluids and steam.

Tube: Steam and heat-resistant EPDM rubber.

Reinforcement: 2 high tensile steel wire braid.

Cover: Synthetic rubber – heat, abrasion ozone and weather resistant.

Temperature Range: Up to 200° C
